USER INTERFACE AND DESIGN

COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD WEBSITE:

GOOD WEBSITE:

PROTOTYPE LINK: https://www.figma.com/design/yuDlMze6do4AGpLprczadf/Untitled?

node-id=0-1&p=f&t=DnfIzzAyQbVo75L0-0

The two websites have distinct designs and approaches. Here's a comparison:

Bad Website

Design Style:
Uses a simple layout with bright background colors and basic product images, lacking visual consistency.

Content:
Shows only product images and names with no detailed descriptions or engaging text.
Navigation:
Provides very limited navigation, making it hard to explore more options.
Purpose:
Mainly focuses on displaying products without emphasizing user experience or branding.

Good Website

Design Style:
Uses a creative and visually appealing layout with soft colors, high-quality images, and attractive typography.

Content:
Includes engaging text, flavor highlights, and visually rich elements that attract users.

Navigation:

Offers clear and simple navigation, allowing users to move easily through the website.

Purpose:

Aims to build strong brand identity and provide an enjoyable user experience.

Key Differences:

Focus: The bad website is product-centric, while the good website emphasizes storytelling and branding.

Design Aesthetics: The bad website uses a simple and basic design, whereas the good website is thematic and visually attractive.

Content Depth: The good website provides detailed and engaging content, while the bad website focuses on minimal information.

Target Audience: The bad website is mainly for quick product viewing, while the good website targets users by building brand connection and engagement.
